NOTES ON THE DATA

DATA COLLECTION AND RESULTS

This report includes data for 152 colleges and universities, including 107 private institutions, 26 foundations affiliated with public institutions, and 19 public institutions. All participants provided investment pool return and asset allocation data as of June 30, 2021. The notation of *n* denotes the number of institutions included in each analysis.

The 152 participants in this study reported long-term investment portfolio (LTIP) assets as of June 30, 2021, totaling \$659 billion. The mean LTIP size was \$4.3 billion, and the median was \$1.2 billion.

Four participants have an LTIP size below \$100 million, while 85 have an asset size above \$1 billion. The remaining 63 participants have an LTIP size between \$100 million and \$1 billion. The participants with LTIP sizes greater than \$1 billion controlled 96% of the aggregate LTIP assets.

In Figures 8 and 10, US equity includes funds that invest primarily in the United States; global ex US equity developed includes funds that invest primarily in developed markets outside the United States; emerging markets equity includes funds that invest primarily in emerging markets regions; and global equity includes funds that have meaningful exposure across two or more of the aforementioned regions. In Figure 9, the summary asset allocation categories align with how the entire asset allocation framework is displayed in Figure 8.

CALCULATION OF THE REAL RATE OF RETURN

The real, or inflation-adjusted, rate of return for a given investment is calculated by dividing the nominal total return by the appropriate deflator for the same time period. Throughout the report, the deflation measure used for this purpose is the Consumer Price Index. Note that simply subtracting the deflator from the nominal total return does not result in an accurate computation of real total return. The formula is:

1 + Nominal Total Return

1 + Deflator

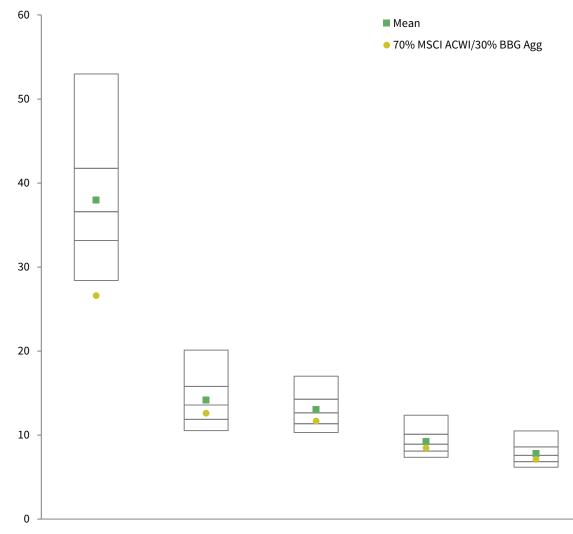

BLENDED PORTFOLIO BENCHMARKS

Throughout the report, the 70/30 simple portfolio benchmarks are calculated assuming rebalancing occurs on the final day of each quarter.

The MSCI indexes contained in this report are net of dividend taxes for global ex US securities.

C&Us By Asset Size

All Colleges and Universities

Current Basis

Total investment pool return for the trailing one-year period includes marketable asset performance and private investment performance for July 1, 2020, to June 30, 2021.

Lagged Basis

Total investment pool return for the trailing one-year period includes marketable asset performance for July 1, 2020, to June 30, 2021, and private investment performance for April 1, 2020, to March 31, 2021.

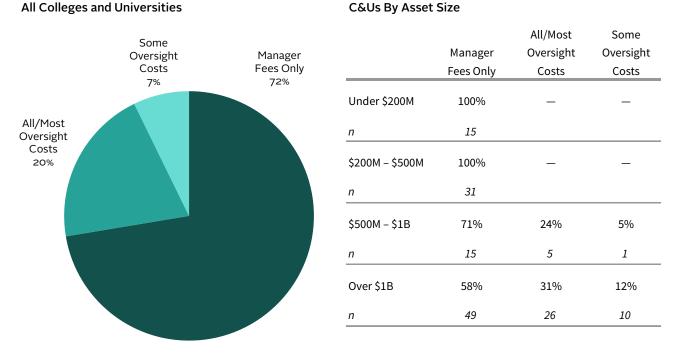

Source: College and university data as reported to Cambridge Associates LLC.

Note: Institutions with no significant private investment allocations (<1% of their total investment portfolios) are reflected in the No PI Allocation category in the pie graph and table by asset size.

FIGURE 4 PERFORMANCE REPORTING METHODOLOGIES: CALCULATION OF NET RETURNS

Types of Expenses Deducted in FY 2021 Net Return Calculation

All Colleges and Universities

Manager Fees Only

Only external manager fees are deducted in the net return calculation. Investment oversight expenses are not netted against the return.

All/Most Oversight Costs

External manager fees plus all or most oversight expenses are deducted in the net return calculation, including the major oversight cost drivers (i.e., investment staff compensation).

Some Oversight Costs

External manager fees plus some oversight expenses are deducted in the net return calculation. However, returns are gross of investment staff compensation that typically represents the largest portion of internal investment office expenses.
